

Globally Registered Education Provider, Recognized by the Project Management Institute

Training Services/Tools

Optimize Project Management Velocity

TSI's project management program training classes support and follow internationally recognized standards such as the Project Management Body of Knowledge (PMBOK®), CMMI® and PRINCE2®. TSI is an authorized PRINCE2 training and certification supplier in the U.S. TSI's teams of skilled, project management program training experts deliver comprehensive training programs, a higher level of system adoption rates and shorter ROI cycles. TSI is a Globally Registered Education Provider as Recognized by the Project Management Institute®.

TSI ties training to business performance optimization

Investment in TSI training programs deliver positive impact by optimizing the performance of project managers as they gain knowledge and velocity. Training begins with a complete assessment of the project management skills and development needs of an organization or team. Then TSI ties client business strategy and project initiatives to specific training needs.

For companies TSI training provides measurable ROI

TSI project management training programs augment internal training programs to strengthen project management capabilities, project execution velocity and improve the quality of deliverables. The TSI project management training program has earned global recognition for quality, content and delivery, providing clients with measurable results.

TSI delivers onsite, online, on-your-own

TSI's project management training curriculum is delivered in a wide range of formats, including on-and off-site programs, interactive online tutorials and through comprehensive CD/DVD packages. CD/DVD packages include complete course manuals, as well as multiple instructional discs.
